

Sams Teach Yourself SQL I 10 Minutes

4th Edition

Setup instructions for Oracle Express 11g

1. Start database
2. Login to web homepage, address is usually <http://localhost:8080/apex/> (there is a link created but it frequently does not work)
3. Create a name and workspace (they can be the same)
4. You'll be able to login to your workspace
5. Click on SQL Workshop
- 6.
7. You can use the SQL Commands option to enter and test SQL commands
8. Copy create text, you may need to copy each CREATE TABLE and ALTER table individually, and then hit RUN. Or paste it all but highlight one statement at a time.
9. Same for populate
10. Try it with `SELECT * FROM Customers;`
